Average Daily Burndown  
1.78 Points

Estimated Completion Date  
Mar 06, 2023

We took on more complex work with higher point counts than last sprint. This is in spite of the fact that we all had midterms that we needed to focus on. Additionally the frontend refactor was probably undercounted as well. In spite of that we still completed more story points than last sprint. In conclusion, it's an acceptable pace.
